- ▶ For better support and comfort Orthopedic Knee Crutches with paddings are used.
- ▶ The traction unit of this orthopedic hanging system is easily foldable which uses very low space.

KEY FEATURE

The Hanging attachment is a very useful and flexible extension tool that is attachable to any operating table and can be used independently to improve orthopedic surgery. This Hanging equipment helps to manage accurate placement and convenience of access during procedures because of its ability of intraoperative x-ray imaging and image intensifier use.

A front corner cutout is incorporated into the unusually asymmetrical pelvic support plate of the Orthopedic Hanging Attachment to easily access patients damaged leg. Its design makes it more adjustable and easier to handle while operations

1. One Knee Support
2. Two boots for traction
3. One Arm Board
4. 1 Support for the Pelvis.
5. Two Leg Rests
