Accompanying the Recovery Journey

Create a Safer Environment

KEY FEATURE

- Introducing our state-of-the-art Radiant Warmer With Resuscitation Unit, a groundbreaking solution designed to provide unparalleled care for newborns in medical settings. This innovative system seamlessly combines the functionalities of a radiant warmer with essential features of a resuscitation unit, ensuring superior support during critical stages of infancy.
- Equipped with a fixed baby cradle and a premium-quality mattress, our warmer prioritizes comfort and stability for newborns. Driven by an advanced micro-processor-based servo Controller, it offers precise temperature control across various modes, including Servo skin, AIR, Pre-Warm, and Manual, delivering tailored thermal management to meet individual patient needs.
- Featuring dual digital displays for real-time monitoring of both baby and set temperatures, our warmer empowers healthcare providers with accurate environmental control. Intuitive soft-touch buttons and customizable temperature units ($^{\circ}\text{F}$ and $^{\circ}\text{C}$) enhance usability and adaptability, ensuring seamless integration into clinical workflows.
- In addition to essential functionalities such as a Baby Feed Reminder, Monitor and I.V stand, Swiveling top for X-ray and Easy Access, LED Illumination for observation, and safety alarms with high-temperature cut-off, our warmer boasts a versatile resuscitation unit for emergency interventions.
- Constructed with clear acrylic walls on all sides and collapsible front and side panels, the resuscitation unit offers exceptional visibility and accessibility during critical procedures. The baby tray, accompanied by a high-quality mattress, guarantees optimal comfort for newborns, while the clear acrylic base facilitates under-surface phototherapy.
- With three convenient drawers at the base for user convenience, our Radiant Warmer With Resuscitation Unit is a comprehensive solution for neonatal care in hospitals and medical facilities. Elevate the well-being and safety of newborns with our innovative and adaptable system.
